Turin, Italy*

Nicola Pompeo
Roma Tre University, Italy

HTSHFF is a vibrant workshop where scientists, engineers, students and industrial developers gather together to discuss all aspects of high-temperature, low-temperature, conventional and unconventional superconductors in high frequency fields, from fundamentals to applications, with a special attention to superconducting devices, original measuring methods and low temperature equipment in high-frequency fields, relevance of superconductors in high frequency fields to cutting edge experiments, and in general all aspects crossing the fields of microwaves, cryogenics and superconductivity.

Strong focus is placed on exchange of information, with ample discussions devoted to cross-fertilization of different fields of academic and industrial research, the common language of superconductivity and high frequency electromagnetic fields, from rf to microwaves to THz.

WORKSHOP VENUE: The HTSHFF 2023 Workshop will be held at UNAHOTELS Naxos Beach Sicilia in Giardini Naxos, Messina, Italy. The UNAHOTELS Naxos Beach Sicilia is a tourist complex perfectly inserted in Giardini Naxos, one of the most beautiful sea resorts of the eastern coast of Sicily.
